

■ ■ ■ VISUAL STYLE GUIDE

dcomp

A graphic language for a substrate of
independently built components — Italian
modernism, ca. 1970.

01 PRINCIPI — THE IDEA

Topology, not flow

The picture shows what is connected to what — never a process, a pipeline, or a sequence of steps. No arrowheads anywhere in the system.

The link is the subject

Two endpoints and one private channel between them. Everything graphic derives from that pair — squares joined by orthogonal line work.

Isolation is drawn

Boundaries are visible rules, not implied space. Dashed encloses what is internal; solid marks what is deliberately routed out.

Flat, always

No gradients, no shadows, no bevels, no glow. Pure fills as if screen-printed in four passes.

02 COLORE — THE FOUR-PASS PALETTE

Blu **LEAD**

#2A5CAA

Structure. The mark's filled endpoint, the largest module.

Rosso

#D8402E

Accent. Exactly one active link, or one key phrase.

Giallo

#EFB02C

Brightener. Never for text — insufficient contrast.

Verde

#3E7C5A

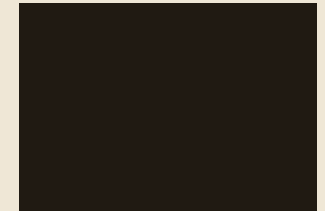

The fourth pass. Sparing — smallest area of the four.

Carta

#EFE7D6

Ground. Warm stock, never pure white.

Inchiostro

#201A12

Type, rules, and all connective line work.

Colour names modules, never states. A hue distinguishes one component from its neighbour; it never encodes health, success, or failure. Module fields rotate the four hues in fixed order — blu, rosso, giallo, verde.

Line work stays ink. Links, lattices, and enclosures are always inchiostro at 18–50%. Rosso line work is reserved for the single link a composition is about.

WORDMARK
150 / 700

dcomp

CLAIM
31 / 500

Components, **wired by hand.**

SECTION HEAD
15 / 700 / .2EM

NORME GRAFICHE

BODY
13.5 / 400 / 1.5

A project owns its interface definitions, component source, Dockerfiles, and wiring.
There is no daemon, no registry, no proxy, and no sidecar.

REGOLE

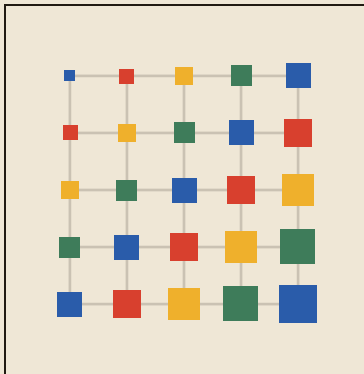

Wordmark is always lowercase. Never capitalise, never letterspace it.

Display type gets negative tracking (–0.06em at wordmark size). Small caps type gets positive (0.16–0.24em).

Two weights only: 700 and 500/400. No italics, no light weights, no condensed cuts.

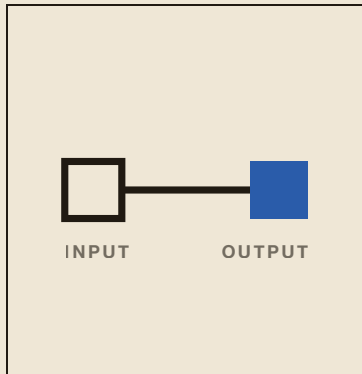

Weight and size carry hierarchy — never colour alone.

One monospace is permitted, and only for descriptor, command, and interface identifiers. It is never used for prose, headings, or the wordmark.

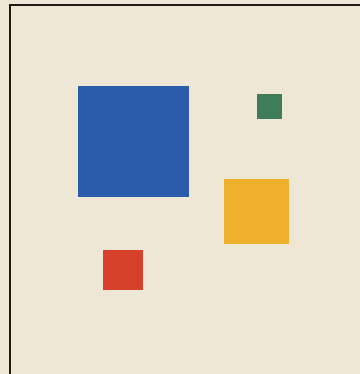

A • Il reticolo

The lattice. Squares on a fixed pitch, scale growing along the diagonal, hues rotating. The hero element — one per composition.

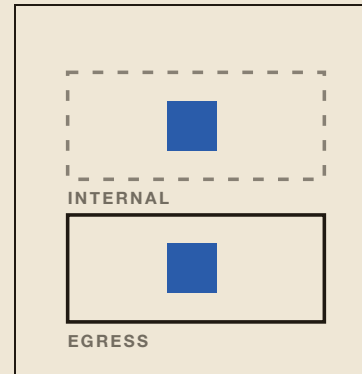

B • Il legame

The link. Open square is the input, filled square the output, one orthogonal line between. Reads input ← output, as the system file writes it.

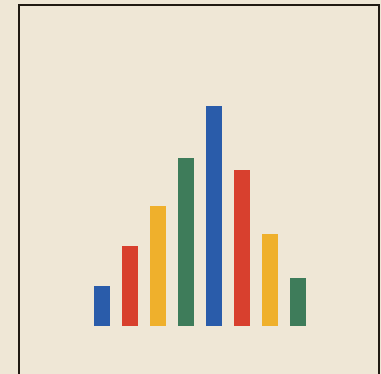

C • I moduli

Flat squares at descending scale, scattered off-grid into empty paper. Four maximum. Never rounded, never outlined.

D • Il recinto

The enclosure. Dashed 2px rule contains what is internal; solid 2px marks what is deliberately routed out. Right angles only.

E • Il pettine

The comb. A rhythmic bar frieze that swells then falls — divider or footer band, sitting on a shared baseline.

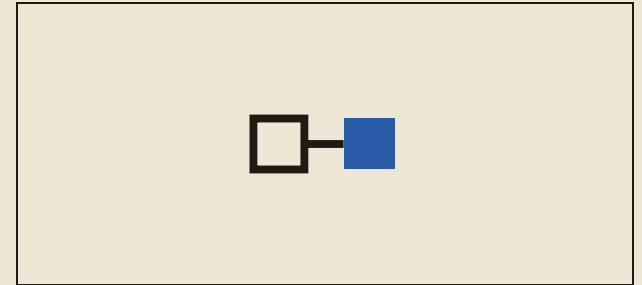

05 MARCHIO — LOCKUPS

A · PRIMARIO

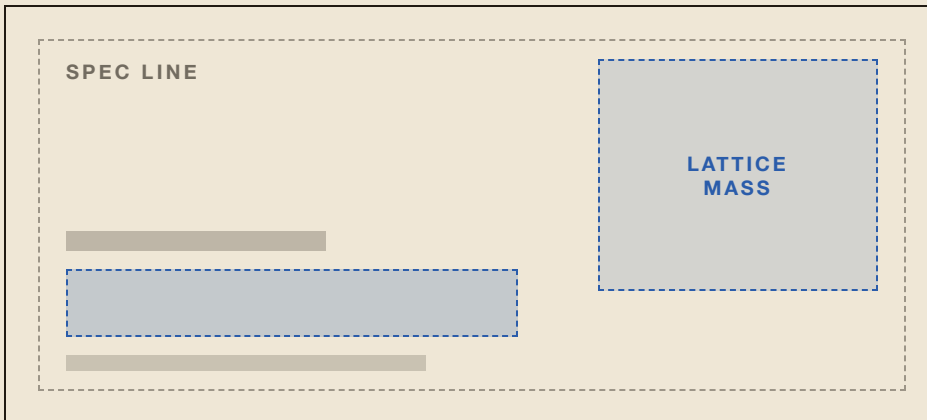

B · NEGATIVO

C · SIMBOLO (FAVICON, AVATAR)

Clear space equals the filled square's width on all four sides. **Minimum size** 24px for the symbol, 96px wide for the horizontal lockup. The two squares never swap fill — the open one is always the input, on the left. Never box the lockup, never set it over a lattice.

06 IMPAGINAZIONE — COMPOSITION

Diagonal tension: spec line top-left, lattice mass upper-right, wordmark block lower-left, feet along the base. Margin 4% of canvas width.

One lattice per composition

A single square field. Two competing masses read as two systems.

Everything on the orthogonal

Lines run horizontal or vertical and turn at right angles. No diagonals, no curves, no rounded joints.

Let the lattice bleed

The square field may run off the edge — the system is larger than the page. Type never does.

Empty paper is structure

At least a third of the field stays bare. Do not fill it with modules or copy.

 SÌ

Flat fills, warm paper, four rotating hues led by blu.

Squares, right angles, and orthogonal line work as the whole vocabulary.

Big tight lowercase Helvetica against small letterspaced caps.

Asymmetric balance with a third of the field left bare.

Lattices bleeding off the edge of the canvas.

Monospace for descriptors and interface identifiers only.

 NO

Gradients, drop shadows, glows, glassmorphism.

Arrowheads, flowcharts, or any left-to-right pipeline diagram.

Pure white grounds or pure black type.

Whales, containers, ships, clouds, hexagons, padlocks, emoji.

Green-for-healthy, red-for-failed status colouring.

Centred symmetrical layouts, or rounded "card" containers.

A fifth colour, a second display typeface, or any italic.
